Summary

A highly motivated and skilled full stack developer with a strong focus on delivering high-quality software solutions. Three years experienced in developing web applications using HTML, PHP, JAVA and other technologies. Proven ability to collaborate effectively with cross-functional teams, while also working independently to meet tight deadlines. Possesses excellent problem-solving skills and is able to develop creative solutions to complex problems. Highly organized and detail-oriented with excellent communication skills. Proven track record of success in delivering high-quality software solutions on time and within budget

Education

- Bachelor of Computer Science, Accra Technical University, 2021

Skills

As a software developer, I have a strong proficiency in coding languages and technologies. I am proficient in the following languages:

- JavaScript: I have extensive experience in working with JavaScript and its frameworks, such as React, and Angular. I am well-versed in creating dynamic and interactive web applications.
- PHP: I have worked in PHP for various projects, including web development, Native mobile apps, and automation. I am proficient in PHP frameworks for building RESTful APIs and web applications.

Web Development

I have a strong understanding of web development principles and best practices. I am proficient in the following web technologies:

- HTML: I am well-versed in creating well-structured and semantic HTML markup for websites.

- CSS: I have a solid understanding of CSS and can create visually appealing and responsive websites.
- JavaScript: As discussed earlier, I have extensive experience in working with JavaScript and its frameworks.
- JQuery: I have a good understanding of jQuery and its capabilities. I utilize jQuery to create interactive and dynamic web applications.
- React: I am proficient in React and its ecosystem. I am capable of building responsive and user-friendly web applications using React.

Database Management

I understand the importance of database management in software development. I am proficient in the following database technologies:

- MySQL: I have worked with MySQL extensively and can handle database queries, schema design, and database optimization.

Testing and Quality Assurance

I believe in the importance of thorough testing and quality assurance. I am proficient in the following testing tools:

- Jasmine: I utilize Jasmine for testing JavaScript applications.
- Jest: I have experience with Jest and can write unit tests and snapshot tests to ensure the quality of my code.

Version Control

I adhere to best practices in version control and maintain version control of my projects using:

- Git: I have a strong understanding of Git and have used it for version control and collaboration on various projects.
- GitHub: I am familiar with GitHub and use it for hosting and maintaining my development projects.

Communication and Collaboration

As a software developer freelancer, effective communication and collaboration are crucial. I am proficient in:

- Email: I communicate effectively via email, providing regular updates and responding to client inquiries promptly.
- Slack: I use Slack for real-time communication and collaboration, enabling efficient communication with clients and team members.
- Collaboration Tools: I am proficient in using collaboration tools such as Trello and Asana for managing project tasks and collaborating with team members.

Continuous Learning and Improvement

I understand the importance of continuous learning and self-improvement in software development. I am committed to staying updated with the latest trends and technologies in the software development industry.

- Critical Thinking: Analyzing problems, considering alternatives, and generating innovative solutions.

Work Experience

- Freelance Developer, Gatmedia, 2020 - present

As a software developer freelancer, I have had the privilege of working on a diverse range of projects and honing my skills in this exciting field. Being a software developer freelancer allows me to have the flexibility to work on projects that align with my interests and career goals.

Another advantage of working as a software developer freelancer is the ability to work remotely. With the rise of remote work, I have been able to work with clients from around the world. This has allowed me to collaborate with talented individuals from different backgrounds and cultures, which has contributed to my growth and professional development.

Moreover, as a freelance software developer, I have the opportunity to work on a variety of projects with different clients and industries. This has allowed me to gain valuable experience and broaden my skill set. I have worked on projects ranging from small businesses to multinational corporations, which has helped me develop a well-rounded understanding of software development best practices.

However, working as a software developer freelancer also comes with its own set of challenges. One of the drawbacks is the lack of a regular paycheck and consistent work schedule. This requires self-discipline and a strong ability to manage time and projects effectively. Additionally, finding clients and securing new projects can sometimes require effort and networking.

Despite the challenges, working as a software developer freelancer has provided me with numerous opportunities for growth and success. The freedom and flexibility to choose my own projects, work remotely, and collaborate with talented individuals have been rewarding experiences.

Experience

- Developed and maintained web applications using HTML, CSS, Javascript, bootstrap, PHP, MYSQL.
- Implemented RESTful APIs to handle data communication between front-end and back-end.
- Collaborated with front-end developers to integrate front -end code with back-end functionalities.
- Debugged and resolved issues to ensure smooth operation of the application.
- Contributed to software development lifecycle, including technical documentation, code reviews, and deployment.
- Assisted in testing and deploying applications on the production server.

Interests

- Reading and Coding
